

SUPPORT STANDARDS

Guiding Principle: The school plant (consisting of site, buildings, equipment, and services) is an important factor in the functioning of the educational program. The school plant serves as a vehicle for the implementation of the school mission. The school plant should provide for a variety of instructional activities and programs and for the health and safety of **ALL** persons. The school plant should incorporate aesthetic features that contribute to a positive educational atmosphere while providing for needed flexibility. In addition to an appropriate facility, sufficient fiscal resources must be available, accounted for and effectively used in order for any school to accomplish its mission and expectations for student learning.
