

Parent Canvas Information

Your student should know their ID Number. If not then you may call the main office (360-313-5200) for assistance.

Username: is the Student ID with a P at the end.

Example: If the student ID is 12345, the parent's login is 12345P (case doesn't matter).

Password: is your student's birthday in the form of M/D/YYYY with no unnecessary zeros and the slashes included.

Example: If the birthday is March 9 2000, the password is 3/9/2000.

There is only **one** parent account per student. A parent with two students will need to log in separately to see each student (Canvas does not have a method to link two students under one parent account).

***The display name associated with the parent account is the name of the student preceded with a "P-" on both first and last names. **Multiple parents will need to share this account.**

Example: If the student is John Doe, the parent is P-John P-Doe

Parent accounts are "Observers" in Canvas that are linked to their specific student on a per class basis.

Parents can view the student's schedule, assignments, submissions, and calendars. Parents **cannot** see grades, submit assignments or take quizzes. They also **cannot** edit anything on Canvas.

Important Note:

Parents will be able to see the contents of a discussion for their student which includes other students' comments or teacher comments as part of your student's discussion. As the discussion tool is for school purposes there should not be any personal use or inappropriate use of the discussion forum. If anything is posted that is inappropriate please notify the administration.

Parents will also be able to see the avatar picture for the other students participating in a discussion with their child. **If you have placed a restriction on the distribution of your student's photo please have them change their avatar photo to one of the icons available or upload an appropriate photo to use.**
