Tagxedo Team Task

What is Tagxedo?
A website that turns words into word cloud according to a pre-selected shape.

Examples:

Whole Group:
- What is copyright? How can we tell what images can be copied, remixed & shared again?
- Creative Commons, or CC, is a website that provides tools that help a growing digital community abide by copyright law.
- Why is this important?

Team Task:
- Break into groups of 2-3
- Go to Tagxedo
- Click "Create"- play around with the various "Respins" and "Options"
- Open a second window and go to Creative Commons- search through content the original creator/artist wants to share freely with the public.
- Select a search option such as Google Images- search for an image that represents your ADVO
- Save image to "My Pictures" and go back to Tagxedo
- Under "Options" click "Shape" and then "Add Image"- select the image you saved
- To add words, click "Load" and type in text that describes your ADVO class
- CREATE! When your team is done, click "Save/Share" and select "16MP JPG"
- Email your final creation to your ADVO teacher

   As a class, vote for the top entry- the winning image will be printed out as a banner & hung up in your ADVO's area at LCHS.
