

Beg. Video Project #2: Music Video

Music Video: Pick a song (school appropriate). You must use at least 5 WS's, 10 MS's and 30 CU's (minimum). Include: 2 PANs, 2 TILTs, 2 RACKFOCUSes, 3 HA's, 1 TRUCK and get extra credit for a Hitchcock Zoom.

Use your iPad to keep track of shots or to create a shot list before you start. You are interpreting your song- so the visuals must go along with your music. You don't have to lip sync or play instruments, but you can if you want.

WS = Wide shot. This shot introduces a new location, new people or new ideas. Think of it as the "Once Upon a Time..."

MS = Medium shot. This is the action. Moves the story forward

CU = Close Up. Details... Emotions... Keeps me interested

Pan is left to right or right to left

Tilt is up/down

Rack Focus shifts the things that are in focus from front to back or back to front

HA is a High Angle

Truck is when you actually walk the camera closer or farther away

Hitchcock Zoom is a Zoom in/walk out or walk in/zoom out at the same speed

Editing: V1 for your visuals, A1 for your natural sound (camera mic- so don't talk while you are recording!) and A2 for your music. You will be lowering A1 so that the music is louder than the NS.
