EYE GUIDE VISUAL GLOSSARY ASSIGNMENT:

1. Read and review the color and principles of design vocabulary and definitions
2. Create your own examples of each term- type or write the definitions as well as making or finding your own visual examples. Use the color vocab within the Design Principle Visual Glossary. **For each Design principle example write the definition of the principle and also of the color term you used.** Choose one of the following formats
   a. Draw/paint/Design your own composition examples of each term in a small 2 x2 in format. You could do a different comp. for each, or use the same comp. for some as well. (for example for the color schemes you could trace the same design and fill in with each of the different color schemes)
   b. Create a power point slide show where you find examples from artists work through-out history (label image with artist's name, title of work etc.)
   c. Do a photo shoot- Find examples of each term through the lens of a digital camera- arrange in a word doc. Or PowerPoint presentation- save final in shared folder.
3. Turn in no later than Thursday 10/17 (that is 2 weeks!)
4. Keep your project to review/study for quarter one vocab quiz.
