

Wheel Video Response format and criteria:

Name

Pottery Wheel Analysis Video Review

Date

Who the potter is and Where you found the video: (Shannon McCafferty Wheel demonstrations from Mrs. Zeller's Website)

Number each step and include:

- 1) Description of what you see the artist doing- hand placements, tools, pressure, etc.
- 2) Reflection of what usually happens when you do this step- and what you can learn and apply from the video to help improve your technique.

Example:

1. **Centering:** Shannon demonstrated how to prepare for centering : wedge into a cone, compress firmly into center of bat, pat at 45 deg. Angle, and how to **Cone** and **Dome** Properly. Shannon When I **cone**, I have a hard time making the clay come up quickly, maybe if I adjust the pressure of my hands and squeeze into the clay more at a 45 degree angle it would help. When I **dome** the clay usually makes a mushroom shape instead of a dome, if I try Shannons' hand placements it will help make more of a dome shape.

Repeat for each step:

2. Opening
3. Pulling
4. Shaping
5. Trimming
6. Removing
7. Trimming a Foot
