

The Elements of Art & Design

Art Elements are the building blocks or 'ingredients' of visual art and design. They are used and combined in a variety of ways to create different visual effects.

- **Line**
- **Shape**
- **Form**
- **Space**
- **Value**
- **Color**
- **Texture**

Line - thick, thin, vertical, horizontal, organic or geometric, broken or cor

Used to create pattern and movement

Line is the path of a point moving through space.

Used to describe forms through Contour, hatching, and Cross hatching

Shape — Connected and enclosed lines- 2-Dimensional
Geometric: circles, squares, triangles, straight lines, sharp edges

Organic: Fluid and curvy

Positive and Negative Shapes:

Negative shapes are
The shapes that make up
The space around the subject

Positive shapes
make up
the enclosed
areas of the
subject

Pablo Picasso's
Crying Woman

ANDRÉ DERRAIN (1880-1954)
'The Turning Road at L'Estaque', 1906 (oil on canvas)

Form -has depth, length, and width and resides in space. It is perceived as three-dimensional
Perspective and realistic rendering are used to capture a sense of 3 dimensions on a flat picture plane

M.C Escher

Robert Arneson
'Wolf Head'

Space - Deep? Shallow? How much is used?

Placement on page, overlapping, and **size** can be used to create a sense of depth. Aerial and linear perspective are often used to create depth.

Pollock - Shallow Space

Wyeth - Christina's World - Deep Space

Value - the Lightness or Darkness of a color or grayscale

Color - Hue, Saturation, Intensity

Primary: Y, R, B

Secondary: G, O, V

Intermediate: Y-G, R-O, B-V etc

Complimentary Color: Opposites

Monochromatic- one color plus tints and shades

Analogous Colors- 3-5 colors right next to each other wheel

Texture - Real or Implied - Rough, Smooth, Shiny, Fuzzy, etc.

Principles of Design - How the Elements of Design are USED

- Rhythm
- Movement
- Balance
- Pattern
- Contrast-
- Emphasis
 - Unity
 - Variety

Rhythm - as in music, establishing a pattern using one of the elements

Mondrian - Broadway Boogie
Woogie

Movement - Controlling the eye of the viewer through the use of the elements of art

□p Art - Movement through repetition and careful placement

Balance - Formal, Informal, Symmetrical, Asymmetrical, Radial

Symmetrical Balance

Edgar Degas - Asymmetrical Balance

Radial Balance

Pattern - Through repetition of elements

Fractals are patterns from nature

Contrast

— Differences in elements of design:
small vs. big, Light vs. dark, intense color vs. neutral
color, jagged vs. smooth, warm vs. cool,
complimentary color pairs

Complementary Colors produce
Contrast

Emphasis - Focal Point, area of interest
to which the eyes are drawn.

Usually created by contrast and intentional
placement in composition

Unity - The finished piece should hold together visually, seem complete, and not too busy.

Unity is created by Repeated elements of Design.

Variety- Creates visual interest
Variety is created by using a range of contrasting and different elements of Design
